EDUCATION

Michigan State University, Lansing, MI — *M.S. Geography*

September, 2015 - July, 2017

Developed a geodata distribution platform for DEM error model data.

University of St. Thomas, St. Paul, MN — *B.A. Geography*

September, 2011 - December, 2014

EXPERIENCE

Snappt, Ojai, CA — *Cloud Engineer*

December, 2023 - Present

I created and now maintain our new SOC 2 Type 2 compliant AWS infrastructure using GitOps and Terraform via Atlantis. Now, I'm actively supporting the company-wide migration to that new infrastructure.

Intterra, Castle Rock, CO — *Senior Software Engineer, Team Lead*

January, 2023 - November, 2024

I led a small Scrum team as we developed across the stack on all of our products. We worked on web apps and APIs written in a myriad of different frameworks, most commonly using JavaScript and/or Typescript.

DocNetwork, Ann Arbor, MI — *Director of Development*

October, 2020 - December, 2022

As leader of a team of 12, I helped craft the technical vision for the future of our product, managed projects, directed process improvement, contributed code, and supported my colleagues' professional growth.

DocNetwork, Ann Arbor, MI — *Front End Team Lead*

September, 2019 - October, 2020

Leading a team of four, I envisioned, planned, and executed projects to reduce tech debt and realize new features. I led User Research with efforts and owned project health updates for internal and external stakeholders.

Change the Outcome, Chanhassen, MN — *Volunteer Web Wizard*

June, 2017 - Present

I built and still maintain changetheoutcome.org, the video streaming pipeline that supports their curriculum delivery, and the tools and services necessary to host them. I also consult on any technical strategy changes.

TOOLS

Terraform, Python
TypeScript/JS, SQL
(Postgres), Docker, ECS,
Helm, Kubernetes,
OpenTelemetry, Grafana

SKILLS

Cloud Architecture

Full Stack Development

Intent-based Leadership

Building Teams

Stakeholder Management

Community
